## Preparation

---

### **Ethernet Option:**

**Plug your Ethernet Cable** (not mandatory, but suggested), connect Streamplay to the router, otherwise you can use WI-Fi connection as alternative (it's automatically enabled)

1. **Apply Power:**

Plug into either the barrel jack or the USB Type C port for power.

2. **Wait for the OS to Boot:**

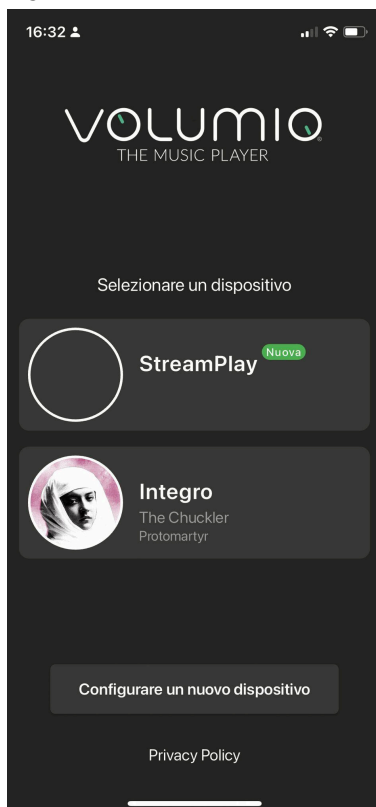

The device will take a moment to power up and be ready for use.

## 2 Configuration

---

3. **Download the Volumio App on Your Smartphone/Tablet:**  
Available on both iOS and Android platforms.

**If you are connected via Ethernet you will see this screen:**

4. **Click on Streamplay and perform the Initial Wizard Setup:**  
Follow on-screen instructions to complete the initial setup.

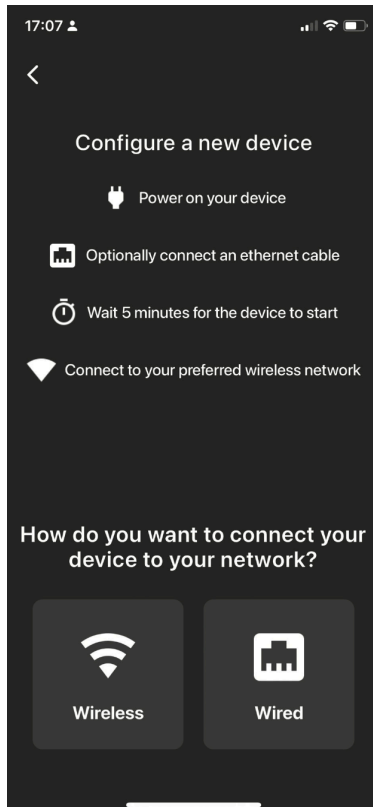

**If you are connected via WiFi :**

**Click on the Button “Configure a New Device”:**

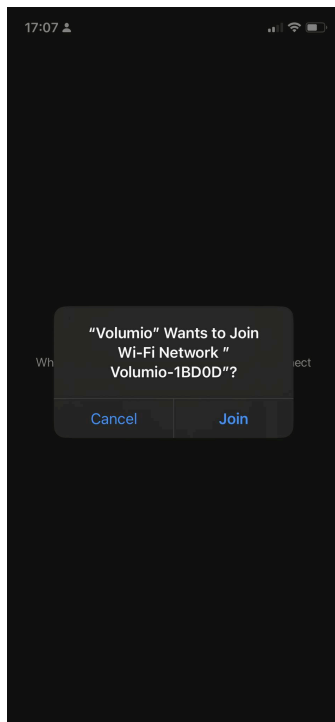

Open the Volumio app and select this option to start configuring your Streamplay device.

5. **Click on the Button “Wireless”:**

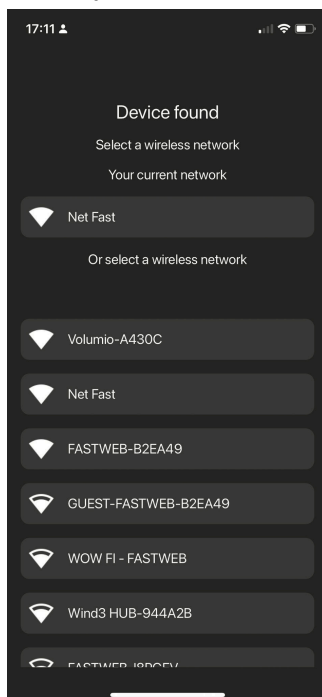

Follow the on-screen instructions to connect your device to your wireless network.

- Grant access permission to the Volumio hotspot

Select your preferred Network:

Starts your the Configuration Wizard:

17:12

Step 1/7: Language

VOLUMIO

The screenshot shows a mobile app interface for the VOLUMIO Configuration Wizard. At the top, the status bar shows the time 17:12 and signal icons. The title 'Step 1/7: Language' is centered. Below it is the 'VOLUMIO' logo. A welcome message 'Welcome, let's get started' is followed by the instruction 'Select your language'. A dropdown menu is open, showing 'English' as the selected option. At the bottom right, there is a green 'Next' button. The background is dark grey.

Follow all the steps of the configuration Wizard until you're done and let's get started!

## 6. **Play Some Music!**

Start exploring and enjoying your audio experience with Volumio Streamplay.
